- Is your Smartphone running slowly or losing battery power quickly?
- Is your phone rebooting unexpectedly?
- Are your bills higher than expected?
- You could be suffering from the growing threat of mobile phone viruses

UMU Scan Mobile Antivirus

A New Threat

There are nearly 500 mobile phone viruses which spread via WiFi, Bluetooth, MMS and storage cards. Despite this threat around 86% of mobile phone users do not have any security software installed even though most viruses cannot be treated effectively by Mobile Network operators.

The Solution

UMU Scan is a fast, powerful and easy to use antivirus tool for securing your Smartphone against known virus threats, spyware and malicious applications that may render your phone unusable and increase your monthly phone bill.
