## umum SpamSafe Mobile Antispam

### Spam: a growing problem to mobile users

Mobile Network operators can only block a small proportion of the growing nuisance of unsolicited text messages that annoy users on a daily basis. Around 80% of European mobile phone users have received spam messages. UMU developed SpamSafe in response to the demand from users for a solution.

### The Solution

UMU SpamSafe is a simple to use application for filtering unwanted messages from both unknown and user specified numbers.
