- **Worried about losing your phone?**
- **Worried about a thief accessing confidential information?**
- **UMU StopThief provides a simple, effective tool for remotely locking your Smartphone or wiping all data.**

UMU StopThief Mobile Antitheft

The Facts

A mobile phone is stolen every 12 seconds in the UK and over 50,000 phones are left in the back of London taxis in an average year. Whether stolen or lost, your Smartphone contains personal data and can be used to make calls at your expense.

The Solution

UMU StopThief is a simple to use application which blocks the use of your Smartphone in the event it is lost or stolen. The application automatically notifies the owner if the SIM card is changed and will provide an exact location if the unit is GPS enabled. For additional peace of mind, UMU StopThief also enables users to remotely lock the mobile device or delete all the information contained on the phone.

ABOUT UMU

UMU is a team of specialist mobile security experts dedicated to providing market leading applications and protecting our users from a wide array of mobile phone threats.

UMU is passionate about mobile security and works with other leading security companies to provide the best possible protection.
